NETWORKS IN SCIENCE AND INDUSTRY

International activities and cooperation with the industry

The Fraunhofer IME cooperates with many international research partners and remains in close contact with universities and other research organizations. The aim is to recognize trends and developments as they emerge, and to develop and implement novel research strategies and technologies.

In 2015, the Fraunhofer IME co-operated with around 100 national and international industrial clients and several international industrial associations for whom confidential projects were carried out.
