

To-Syn-Fuel Project To Convert Sewage Sludge In Value-Added Products

Fraunhofer UMSICHT

eEUBCE 2020
7 July 2020

Dr. Robert Daschner

TO-SYN-FUEL

Project Overview

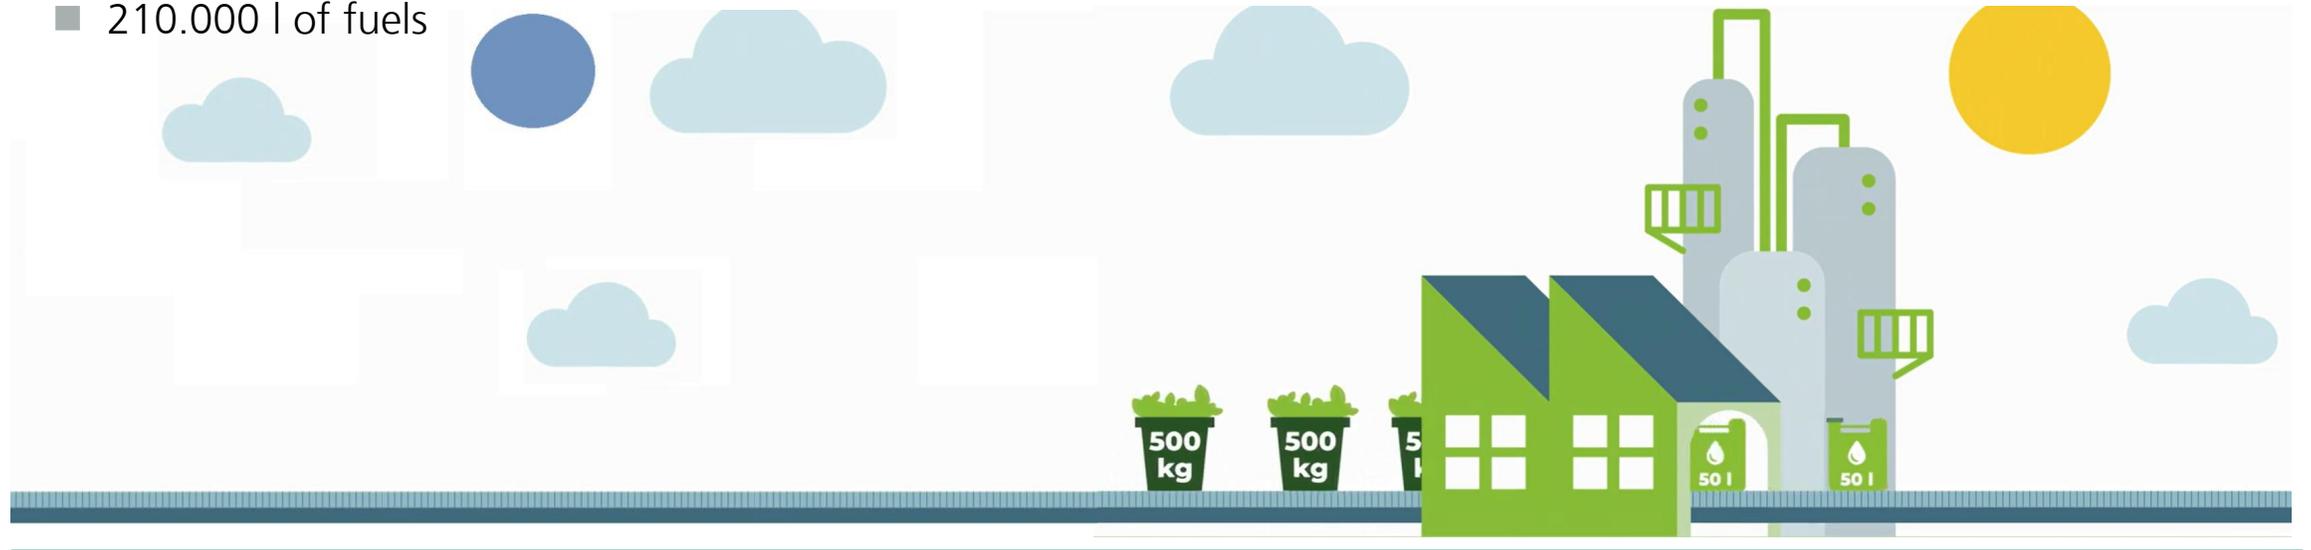

- Green fuels from Residues
- Project start May 2017
- Ends September 2022 (amendment ongoing)
- 11 partners from 5 different countries (amendment ongoing)

TO-SYN-FUEL

Goals

- Production of green hydrogen, diesel and gasoline from sewage sludge
- Showcase for future sustainable investment and economic growth across Europe
- Development of a business case, LCA and dissemination of results
- Project Key Performance Indicators:
 - 2100 t/a of sewage sludge consumption within the project
 - minimum 300 kg/hr (biomass dry basis) plant demonstration scale
 - 210.000 l of fuels

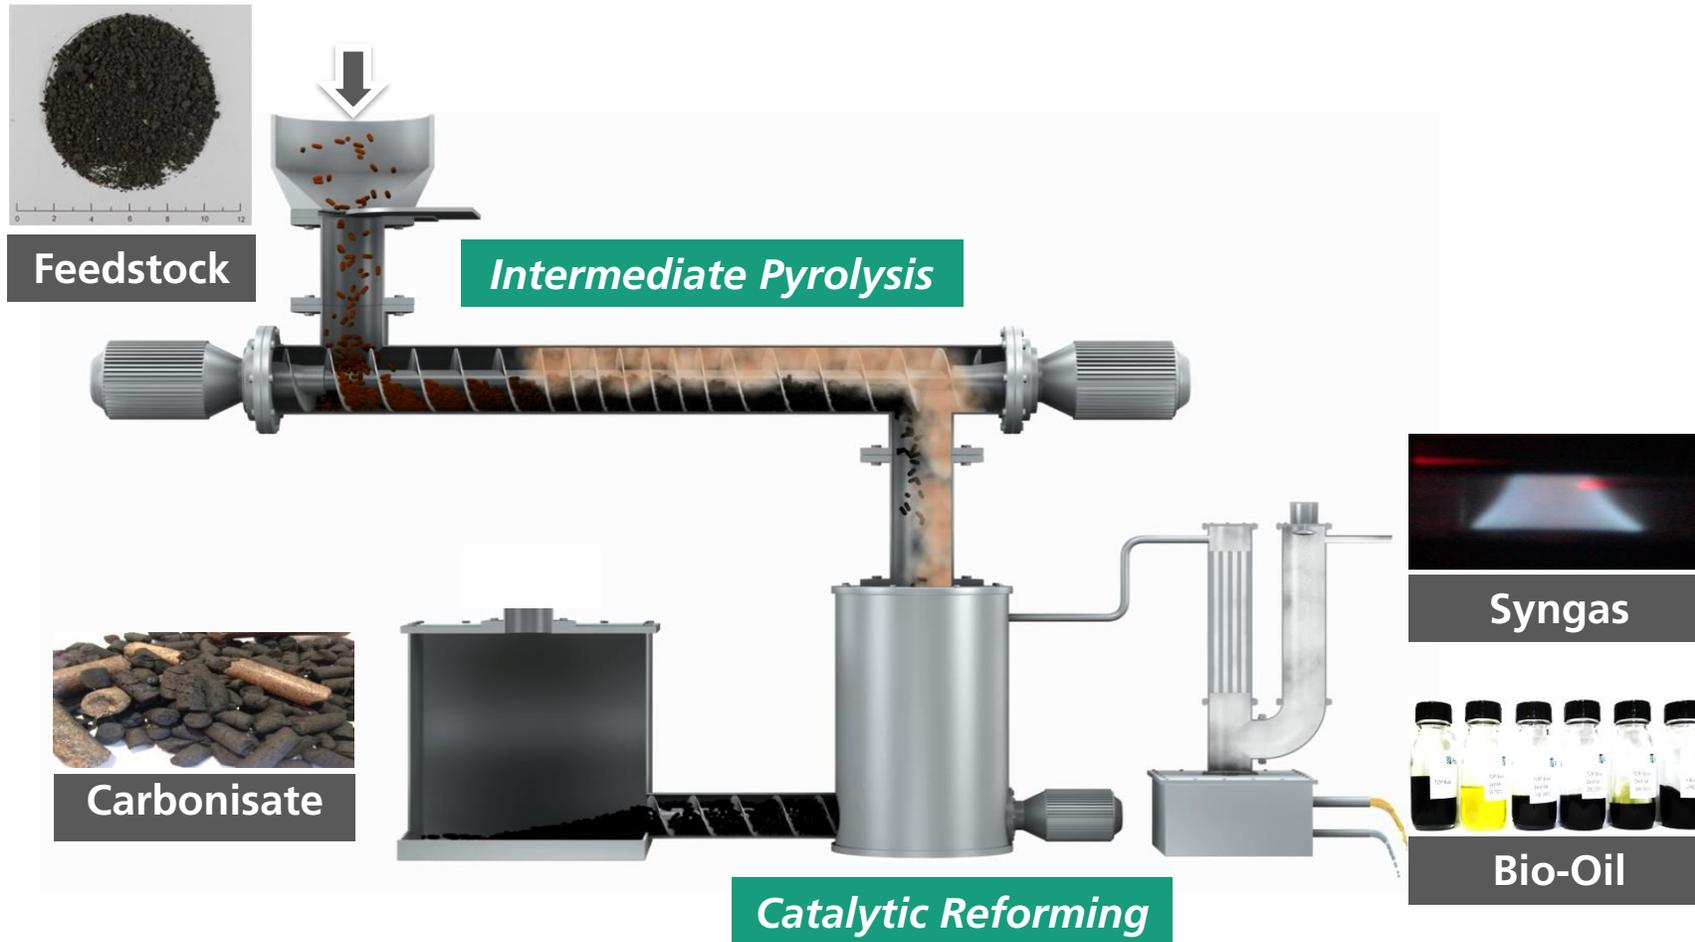

TO-SYN-FUEL

Core components

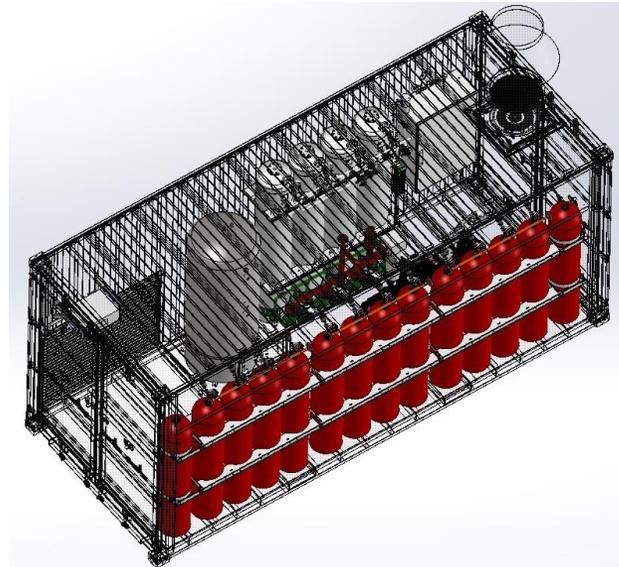

TO-SYN-FUEL

Thermo-Catalytic Reforming (TCR[®])

TO-SYN-FUEL

Pressure Swing Adsorption (PSA)

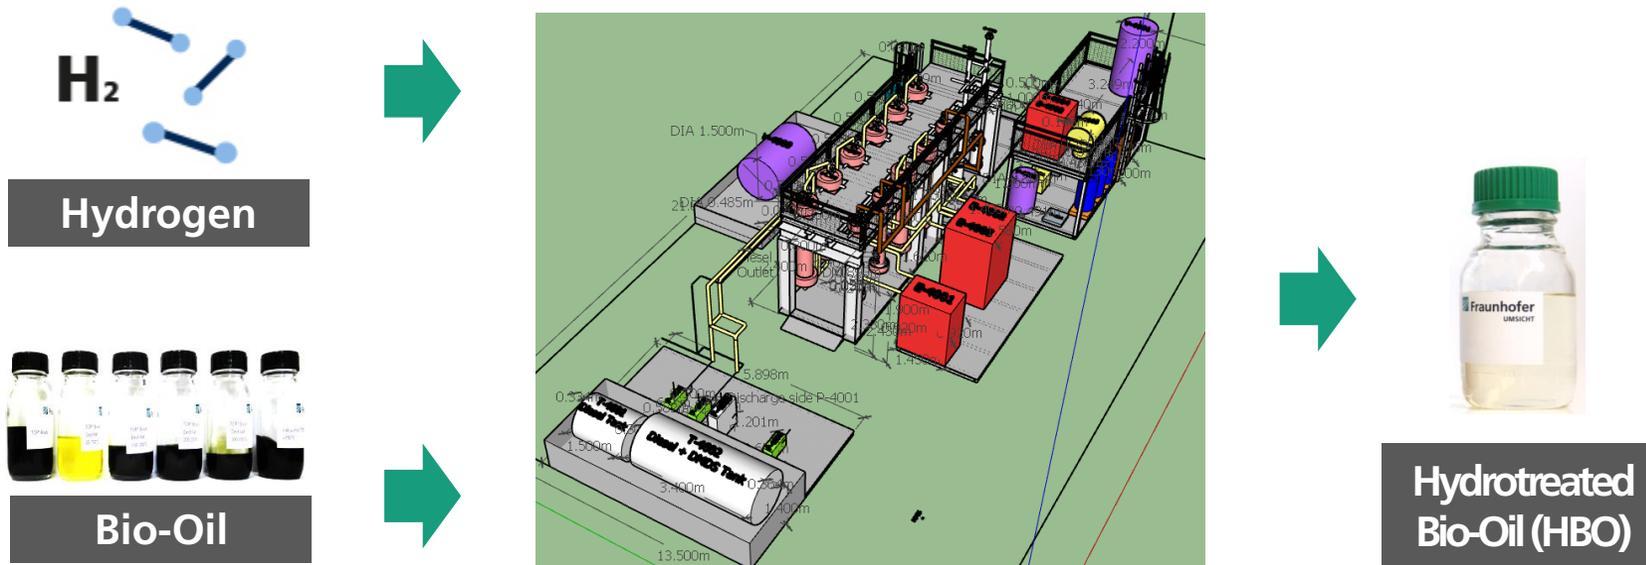

Hydrogen

Residual gas for
Heat & Power

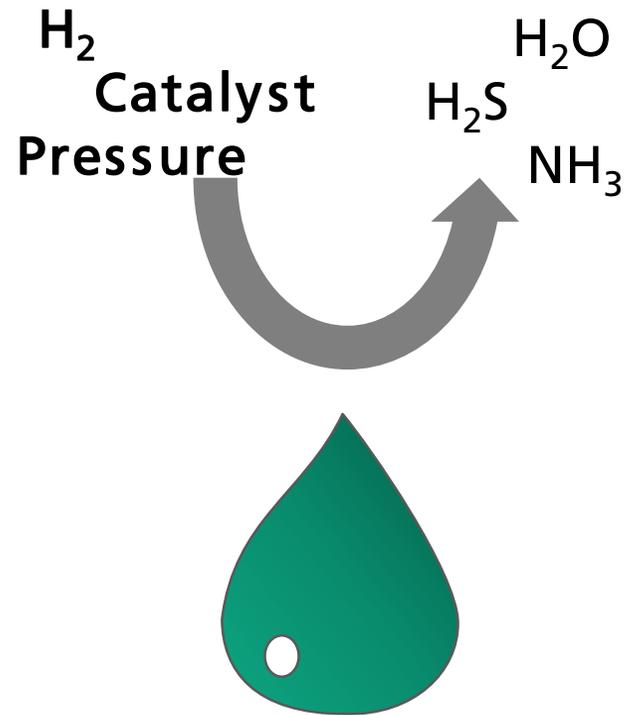

TO-SYN-FUEL

Hydrotreatment (HDO)

TO-SYN-FUEL

Hydrodeoxygenation (HDO)

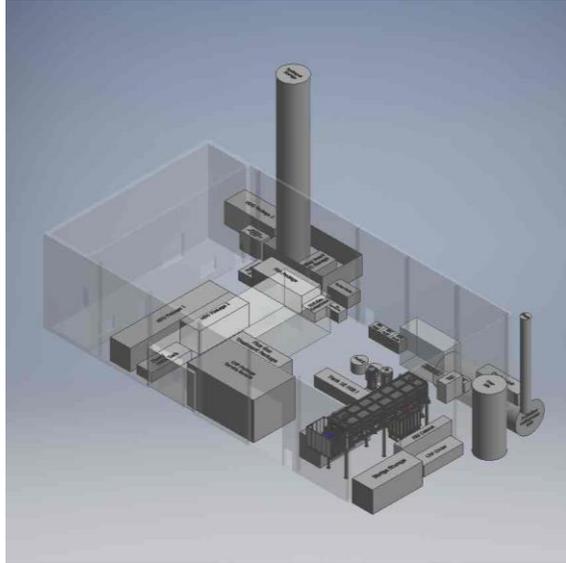

Where we are at the moment

Demonstrator is growing – assembly started

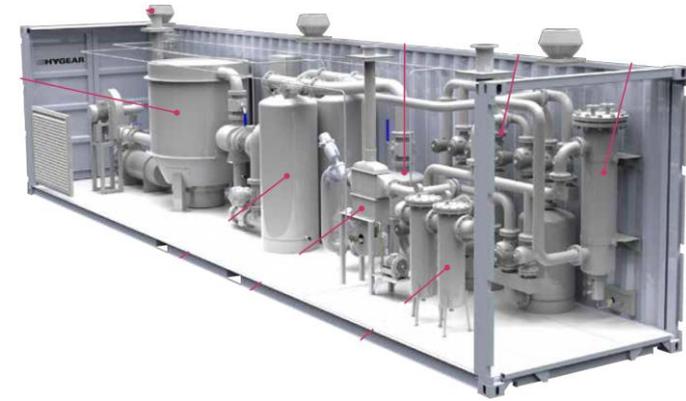

Where we are at the moment

Demonstrator is growing – assembly started

Where we are at the moment

PSA Unit delivered to site location

Where we are at the moment

Test drive with first green fuel

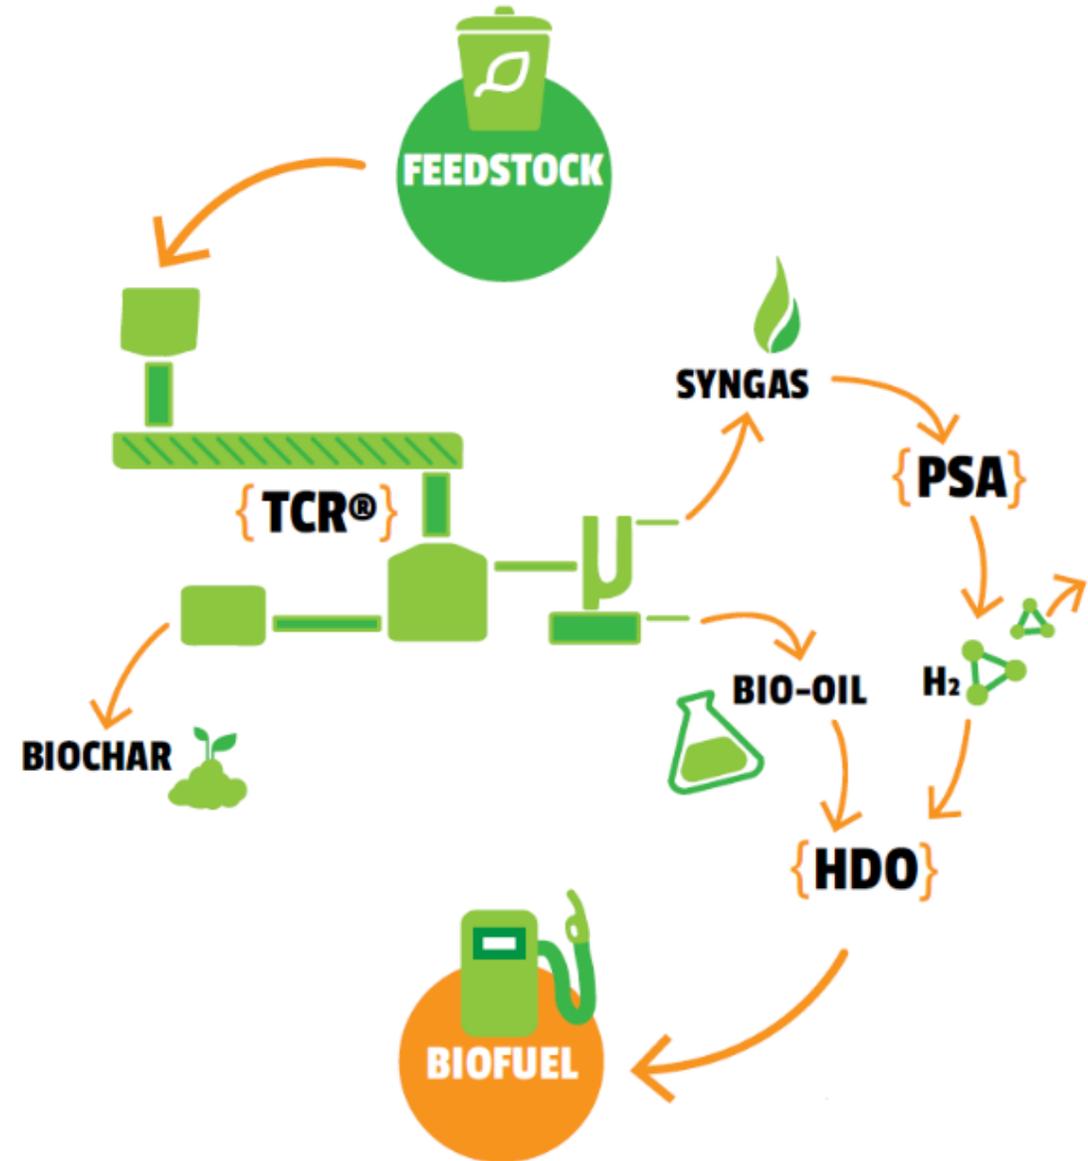

Former rally world champion
Walter Röhrl

Conclusion & next steps

- Longtime demonstrator of integrated technology
- Biogenic residues to green fuel and green hydrogen
- Demonstrator under construction
- Commissioning in 2020
